

# HOME OF HOPE SPECIAL NEEDS ORPHANAGE INDIA

ARCHITECTS  
WITHOUT  
FRONTIERS

PROJECT:	HOPE OF HOPE SPECIAL NEEDS ORPHANAGE + SCHOOL
PROJECT TYPE:	INTERNATIONAL DEVELOPMENT
LOCATION:	NEW DELHI, INDIA
PARTNER:	NBRSARCHITECTURE
FUNDER:	SELF FUNDED
CLIENT:	ONE LIFE TO LOVE (OL2L)

**“We are truly amazed at and grateful for the work put in so far by NBRS and AWF. The pandemic has definitely thrown us through a loop, but I am very hopeful and excited for this vision to become a reality!”**

COURTNEY LALOTRA (FOUNDER OL2L)

One Life to Love contacted AWF early in 2020 to discuss their vision of setting up a self-sustaining Green Campus as an oasis for disadvantaged children, women and animals. The brief is for a centre which will specifically house children & young adults with special needs, while running an education facility for the children of migrant workers, a women-run production line for sanitary pads, an animal rescue centre, an organic farm and a community health clinic.

AWF Network Partner NBRSArchitecture took up the challenge to prepare a masterplan and concept design for the campus to facilitate costing and fundraising for the project.

NBRS Design Director Andrew Duffin explains that ‘the core of NBRSARCHITECTURE is about creating life changing environments. ‘As architects of the green campus for One Life to Love in Delhi we can assist by creating an environment which supports a sense of shelter and belonging for homeless and disadvantaged children and widows. The impact of our design on people’s lives is the priority of our work.’
